RE: Tennessee Gas Pipeline Company, L.L.C. --Northeast Energy Direct Project

Dear Assistant Town Administrator Nazarian,

On behalf of Tennessee Gas Pipeline Company, L.L.C. (Tennessee) as it relates to its Northeast Energy Direct Project ("NED Project"), this correspondence serves as a brief project update.

The NED Project is a federal undertaking that is regulated by the Federal Energy Regulatory Commission ("FERC") under Section 7(c) of the Natural Gas Act. On September 15, 2014, Tennessee requested authorization to use the FERC's Pre-Filing Process ("Process") for the NED Project and the FERC approved Tennessee's request on October 2, 2014 in FERC Docket No. PF14-22-000. Tennessee submitted drafts of Resource Report 1 (General Project Description) and Resource Report 10 (Alternatives) to the Commission on November 5, 2014. Tennessee, after evaluating several route alternatives for the proposed pipeline facilities, has now determined that it will modify the proposed route of the Wright, New York to Dracut, Massachusetts Pipeline Segment of the project by adopting two of the alternatives discussed in the draft Resource Report 10. These two alternatives (the New York Powerline Alternative and the New Hampshire Powerline Alternative) involve co-locating the pipeline along an existing electric transmission line corridor in eastern New York, western Massachusetts, and southern New Hampshire. On December 8, 2014, Tennessee submitted a supplemental filing to the Commission that reflects the modification to the proposed route.

Please note that the Town of Tyngsborough is no longer impacted by Tennessee's preferred route for the NED project utilizing the New York Powerline Alternative and the New Hampshire Powerline Alternative.

Tennessee continually strives to keep the public sector and involved stakeholders apprised of the status of the NED Project. Tennessee is also working with FERC Staff to establish a series of open house meetings, anticipated to be scheduled during the period January 2015 through March 2015 to discuss the Project with affected stakeholders.

Thank you very much for your ongoing interest in this project. Please be aware that additional information can be found on the project website at: nedinfo@kindermorgan.com. I remain available at either: allen_fore@kindermorgan.com or via telephone at (630) 725-3044.

Sincerely yours,

Allen Fore
Vice President, Public Affairs
